PROFESSIONAL SUMMARY

Frontend developer building production applications since 2023 with React and TypeScript. Experience in SaaS dashboards, API integration, permissions and English/Arabic interfaces across advertising, sports analytics and field-service products. Also built a React Native companion app.

PROFESSIONAL EXPERIENCE

Frontend Developer | LeadsMart

Jan 2025 - Present | Full-time | Cairo, Egypt

Platform reach: 500+ companies and 1,800+ active sales agents (company-reported).

- Rebuilt the advertising platform frontend from Figma using React and TypeScript, with reusable components and feature-based architecture.
- Delivered Facebook and TikTok campaign creation, lead management, analytics, billing and wallet workflows, with English/Arabic layouts and permission-gated navigation.
- Implemented TanStack Query caching, Zustand state management and IndexedDB/Dexie offline lead updates.
- Built a React Native and Expo companion app with shared TypeScript modules for web and mobile workflows.

Frontend Developer | TactiSport

Mar 2026 - Jul 2026 | Part-time | Remote

- Built a tactical pitch renderer and 12+ interactive football reports with D3.js and Recharts, covering formations, pressure and movement relationships.
- Implemented a React portal with access controls for five user roles and bulk report uploads using AWS S3 presigned URLs.
- Developed an English/Arabic Next.js landing experience and localized the portal with right-to-left layouts.

Frontend Developer | Big Data Egypt for Systems

Dec 2023 - Jan 2025 | Full-time | Cairo, Egypt

- Built a React and Supabase field-service platform with ticket assignment, maintenance scheduling, machine inventories and spare-parts tracking.
- Implemented PostgreSQL data models, authentication and row-level security; added PDF maintenance reports and validated Excel data imports.

Frontend Developer | Lnr

Oct 2024 - Nov 2024 | Part-time | Remote

- Built responsive healthcare dashboards with React, TypeScript and Tailwind CSS; integrated REST APIs with TanStack Query and Axios in a remote code-review workflow.

SELECTED PROJECT

Maraqez | Educational center management system

- Built an Arabic-first React/TypeScript app for students, exams and payments, with QR attendance, payment-status checks, filterable data tables and revenue dashboards.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, HTML, CSS, Tailwind CSS, React Native, Expo

Data & UI: TanStack Query, Zustand, Redux Toolkit, REST APIs, D3.js, Recharts, RTL/i18n
